

DYI Bell Tree Mallet Holder

By Karen Van Wert

This is a video describing how to create an inexpensive mallet holder. The depth of the potato chip can helps keep the mallets from dumping over. Also, put a pair of old gloves or some other rag in the bottom so the mallets don't make a loud sound when you drop them in.

Supplies:

- 1 Potato Chip Can
- 1 ½" #8 machine screw and nut
- 1 Conduit hanger
 - 1" – Jeffers BT Stand/lightstand
 - 2" – Speaker stand
- 1 Paper punch
